**ACCUPUTT will:**

- ✓ Improve Putting Accuracy
- ✓ Lower Your Golf Score
- ✓ Provide Instant Feedback
- ✓ Build Muscle Memory

## Welcome to Accuputt - Perfect Practice, Perfectly Convenient!

**Putting is 50% of your golf score! If you want a lower golf score, learn to putt better and with confidence! ACCUPUTT!**

Accuputt is the **ONLY** putting stroke development system that will naturally and permanently grove your putting stroke, increase your putting accuracy, and lower your golf score without the use of artificial gimmicks that are not available to you on the green.

**Accuputt will improve your putting performance by 50% in just 30 days with just 15 minutes of practice daily** from the convenience of your **home** or **office**! **This is not a "claim", it's a FACT!** This was the **result for 95% of golfers** of varying handicaps and putting styles in Independent Consumer Tests of our Accuputt putting stroke training system.

Of course, **regular practice is the key to improvement** and golf is no exception. But finding a convenient place and time to practice is often difficult. No more! **Accuputt brings the practice green to you in your living room, bedroom, garage or office...** Fact is, **Accuputt makes Perfect Practice, Perfectly Convenient!**

**"GolfTestUSA has tested many putting training aids in the past 10 years but we have never seen one that produced such positive results for almost the entire group of testers as the ACCUPUTT Putting Stroke Development System."** Wayne Willians, Director of Testing.

ACCUPUTT is a unique and effective **Patent-Pending indoor golf putting stroke development system** that uses an **Invisible Laser System** and **Variable Aperture Putter** to focus your training into a narrow range of precise putting stroke motions that **guarantees you will be "square" at impact, and follow-through** on a perfect aimline... with **Instant Visual and Audio Feedback** to let you know if your putting stroke is off-plane! Accuputt has no artificial rails, tracks or guides found on "can't miss" putting gimmicks. Accuputt creates a true stroke development simulation environment, in a compact, portable system that **WILL improve your putting**.

ACCUPUTT's **unique practice "green"** shoots a Class-1 laser invisibly along the axis of the perfect putting stroke through an adjustable aperture on the putter head. As you **practice your stroke without breaking the invisible laser line, your brain systematically and quickly programs and trains the muscles** of your shoulders, arms and back to produce the kind of precise and consistent stroke

accuracy you've always wanted.

The **training putter** has the weight and balance of today's most popular putters, so you can train with ACCUPUTT and still use your putter of choice on the green. And because the aperture is adjustable, you can you can **effectively practice putting strokes for long "lag" putts or a delicate 5 footer!**
